GUIDELINES FOR OBTAINING A REFERRAL

Our office will no longer accept a referral request on the day of, or after, an appointment. You must contact your Primary Care Provider (PCP) 72 hours before the scheduled appointment with a specialist.

All HMO and select POS plans require referrals. Your PCP is the only entity authorized to provide you with this document.

If you fail to contact us 72 hours prior to the appointment, you may be responsible for any and all expenses charged by the specialist to your insurance company. You can contact your insurance company for a listing of a specialist in your network that requires a referral. If you have not been seen within six months of your last visit, you will need to schedule an appointment to obtain your referral.

Thank you for your cooperation

Respectfully,

Referral Coordinator
